DETAILED ACTION

Allowable Subject Matter

Claims 1, 2, 7-12, 17, 18, 20-23 are allowed.

The following is an examiner's statement of reasons for allowance: Regarding claim 1, prior art fails to specifically disclose a method for measuring the wave aberrations of the eye, based on probing the eye with a narrow laser beam detection of the radiation scattered by the retina characterized that measured, that are located along concentric circles with a common center which coincides with the center of coordinates, wherein the approximation of partial derivatives at the beginning is performed along each concentric circle and then along radii to the pupil points and the wave front is reconstructed by means of the numerical integration as in claim 1; means of spline approximation using the data for the discrete set of pupil points, where the wave front tilt values are measured, that are located along straight lines which are parallel to an axis in the rectangular coordinate system and the wave front is reconstructed by means of numerical integration as claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
